ABOUT

I am a passionate software developer with experience in frontend technologies. My journey started with Core Java and Advanced Java, where I built a strong foundation in object-oriented programming and backend development. Alongside Java, I gained expertise in HTML, CSS, and SQL, allowing me to work on full-stack applications.

As my interest in mobile development grew, I transitioned into React Native to build scalable and efficient mobile applications. Currently, I am working at Capternal Software Pvt Ltd, where I develop and optimize cross-platform mobile apps using React Native.

TECHNICAL SKILLS

[CORE JAVA](#) [SQL](#) [Hibernate](#) [JDBC](#) [HTML](#) [CSS](#) [javascript](#) [React Native](#) [GitHub](#)

PROJECTS

PORTTFOLIO WEBSITE

Developed a personal portfolio website to showcase my projects and skills.

Technologies: HTML, CSS - process

FRONTEND APP DEVELOPMENT(Vehicle parking system)

Developed the frontend for an application to enhance user interaction and experience.

Technologies: HTML, CSS.

Turf Booking App Development(Ongoing Personal Project)

Developing a Turf Booking application using React Native. Implementing **React Native Bottom Sheet** for an improved user experience, **React Hook Form** for efficient form handling, and **Vector Icons** for enhanced UI. Integrating **Redux** for state management, using **Modals** for pop-ups, and designing an intuitive interface to display available turfs and booking history. Continuously enhancing the app while preparing for backend integration.

Company Panel App Development

Independently converted a company panel website into a React Native mobile app, developing the project from scratch. Integrated API endpoints using Redux for state management and implemented **React Hook Form** for efficient form handling. Utilized **AsyncStorage** for secure user authentication, **React Native Vector Icons** for enhanced UI, and **React Native Side Drawer** for navigation. Implemented **React Navigation** for seamless screen transitions, modals for pop-ups, and toast messages for success notifications.

ATM Banking System Project

Description: Developed a Java-based console application that simulates core banking functionalities

Technologies: java

Hotel management system Project

Description: Developed a Java-based console application that simulates hotel management system

Technologies: java

AUTO MOBILE CAR WEBSITE CLONE

DESCRIPTION: Developed an automobile website using HTML and CSS

EXPERIENCE

2025 - Present ● Software Developer

Pune, India **Capternal Systems Pvt. Ltd.**

EDUCATION

08/2020 - 05/2024 ● 24 (BTech)

solapur **Walchand institute of technology**

- Electronic Engineering at Walchand institute of technology
- CGPA =9.22

08/2018 - 05/2020 ● 20(HSC)

solapur **Maharashtra state board of Higher secondary education**

- At A. D Joshi junior collage Solapur
- Percentage = 70%

EDUCATION

01/2017 - 12/2018

solapur

18(SSC)

Maharashtra state board of secondary education

- Indian Model School Akkalkot
- Percentage = 90%

ADDITIONAL SKILLS

Creativity

Responsibility

Communication

Time Management

Teamwork

CERTIFICATION

All Certificates

https://drive.google.com/drive/folders/1320qjKopTE_ccu6Wwsg2JejlDkKiPol?usp=drive_link

KEY ACHIEVEMENTS

Efficiency Boost

Increased app efficiency by 30% using optimized Java code.

Load Time Reduction

Reduced app load times by 40% through code optimization.

Cross-Platform Apps

Developed cross-platform apps utilizing React Native.

TRAINING / COURSES

Java full stack development course
